

Electrostatic Discharge Immunity Testing Manual

Conforming to
IEC 61000-4-2: 2001 Ed 1.2
&
2009 Ed 2.0 Planning Revision

- Table of Contents -

1. PURPOSE.....	4-2-4
1.1 Point and Concept of IEC 61000-4-2.....	4-2-5
1.2 How to Read this Manual and Points to Note	4-2-7
1.3 Flowchart and Content of Each Chapter	4-2-7
1.3.1 Contents of Each Chapter	4-2-7
1.3.2 Flowchart for reading procedure of the Manual	4-2-8
2. PREPARATION OF THE TEST ROOM.....	4-2-10
2.1 Flowchart for Preparation of the Test Room	4-2-11
2.2 Preparation of the Test Room.....	4-2-12
2.2.1 Condition Required in the Test Room	4-2-12
2.2.2 Climatic and Other Environmental Conditions	4-2-13
(1) Adjustment of the temperature	4-2-14
(2) Adjustment of the humidity.....	4-2-14
(3) Adjustment of the atmospheric pressure.....	4-2-14
2.3 Preparation Prior to the Test	4-2-15
2.3.1 Items to be Prepared Prior to the Test.....	4-2-15
(1) <u>ESD</u> _{Reference 12} generator <electrostatic discharging simulator>	4-2-15
(2) Ground reference plane	4-2-16
(3) Horizontal coupling plane (HCP) or insulation pallet <Fixtures on table-top and floor>.....	4-2-17
(4) Vertical coupling plane (VCP).....	4-2-19
(5) Discharge resistance cable.....	4-2-20
2.3.2 Placement and Wiring of Equipments for the Test	4-2-21
(1) Method to connect grounding conductor	4-2-21
(2) Battery-operated EUTs – <i>Amendment 2:2000</i>	4-2-24
2.3.3 Verification of the Waveform	4-2-25
3. TEST METHOD	4-3-28
3.1 Flowchart for Test Method	4-2-29
3.2 Common Preparation (Placement, Wiring, Etc.)	4-2-30
3.2.1 Placement and Wiring of the EUT and Preparation of the Insulation Sheet	4-2-30
(1) For table-top EUT.....	4-2-30
(2) For floor-standing EUT	4-2-31
3.2.2 Status of EUT	4-2-32

3.3	Test Method.....	4-2-33
3.3.1	In case of performing Direct Discharge.....	4-2-34
	(1) Determination of the injection point and discharging method.....	4-2-34
	(2) In case of performing contact discharge.....	4-2-36
	(3) In case of performing air discharge.....	4-2-41
3.3.2	In case of performing Indirect Discharge.....	4-2-44
	(1) Discharge to HCP.....	4-2-44
	(2) Discharge to VCP.....	4-2-45
3.3.3	Test method for non-grounded EUT.....	4-2-49
4.	CLOSING.....	4-2-50
4.1	Necessary Information for Test Report.....	4-2-51
4.1.1	Management of Test Report.....	4-2-51
	(1) Management and types of report.....	4-2-51
	(2) Name and address of user.....	4-2-51
	(3) Clarification of responsibility against test.....	4-2-51
4.1.2	Test Environment.....	4-2-52
	(1) Date of test.....	4-2-52
	(2) Location of test.....	4-2-52
	(3) Environment such as temperature and humidity.....	4-2-52
4.1.3	EUT and Test Equipment.....	4-2-52
	(1) Name and description of EUT.....	4-2-52
	(2) Identification number of test equipment.....	4-2-52
4.1.4	Test Method and Test Result.....	4-2-53
	(1) Test method.....	4-2-53
	(2) Test result.....	4-2-53
4.1.5	Other.....	4-2-54
	(1) Appendix.....	4-2-54
	(2) Record uncertainties in the evaluation.....	4-2-54
5.	MATERIALS FROM STANDARD AND EXPLANATIONS.....	4-2-56
5.1	IEC 61000-4-2 Standard.....	4-2-57
5.2	Evaluation Criteria.....	4-2-81
	(1) EN50082.....	4-2-81
	(2) CISPR24.....	4-2-82
	(3) CISPR24 Memory Devices.....	4-2-83
5.3	Example of Test Reports.....	4-2-84

IEC 61000-4-2 — Table of Contents —

5.4	Development Background of IEC Standard	4-2-94
5.5	Test Methods Other Than IEC.....	4-2-95
5.5.1	Blade Method	4-2-95
5.5.2	Method initiated by Noise Laboratory co., Ltd.	4-2-96
5.6	Data Relating to Electrostatic Discharge Phenomenon.....	4-2-97
(1)	A triboelectric series of substances in an order of positive to negative charging as a result of the triboelectric effect (DOD-HDBK-263).....	4-2-97
(2)	Typical electrostatic voltage (DOD-HDBK-263).....	4-2-97
5.7	References	4-2-98
5.8	Conformed Products Available from Noise Laboratory Co., Ltd.	4-2-99
